2 The proposal will not only create an inconvenient precedent but also add to the liabilities of the Municipality towards water charges, which is seen to be on the increase Applications from several other Institutions of the kind will be forthcoming for a similar concession There being a public tap situated within a distance of 200 feet the necessity to instal a tap at the premises is not also apprent On the other hand this might give scope for wastage of water at a time when conservative measures are considered very essential The 'Garadi' cannot be classed as a charitable institution and in view of this and the above reasons there does not seem to be any need for giving a free tap
